TURNER
HIGH QUALITY MACHINERY AND SPARE PARTS
FOR THE LEATHER INDUSTRY

JUMBO / SEDELMAT

立式做软机

VERTICAL STAKING MACHINE

应用

山羊皮
绵羊皮
裘革
绒面革

Applications

Goat skins
Sheep skins
Furs
Suedes

SEDELMAT

刀辊为六边形柱体，上面铺有特殊布置的刀片，从而可以均匀地拉伸和做软皮革。磨刀可以根据做软强度要求、皮革种类或成革品种的不同而加以调节。

His mechanical action is ensured by a roller made from hexagonal steel bar which stretches and stakes the skin uniformly due to the special positioning of the blades. The grinding of the blades is determined by the intensity of strength required, the type of skin and the final product to be obtained.

皮革由气动夹子固定在由液压柱驱动，可以上下移动的支架上。当支架上行时，托布会把皮革压向工作辊，同时，工作辊对皮革施加向下的力，拉伸、做软皮革。装在工作辊上的尼龙刷子可以使皮革更加柔滑，也可除掉皮革上的皮屑。

A hydraulic column raises and lowers the frame on which the skin has been fixed thanks to a pneumatic clamp. During the rise, the skin is pressed by a leather bolster against the working roller which then stretches the skin downwards. The pressure of the bolster on the skin is hydraulically regulated. Some nylon brushes mounted on the roller smooth and clean the skin of the dust.

JUMBO

刀辊为十二边形柱体，上面不仅铺有刀片和刷子，还有磨石。因而，不仅有拉伸、做软，还会有打磨。磨革效果取决于所用磨石的磨料粒度

His mechanical action is ensured by a dodecagonal steel bar roller, fitted with blades, brushes and abrasive stones. So, in addition to the stretching and staking effects, we get a buffing effect which fineness depends on the grit chosen for the stones, function of the final article to be obtained.
